# Contents

The abstract is a short summary of the important points of the work, or a very brief statement of the rationale for conducting it. It describes the work, but without details. It concludes with a brief statement of the importance of the findings. It is a self-contained unit allowing the reader to find out the importance of the work without having to actually read its main body.

Citing other papers is easy. Voilà: [CMS/CERN(2012)] or [Holstein(2009)]. Click on the `cite` button in the toolbar to search articles and cite them. Authorea also comes with a powerful commenting system. Don't agree that  $E = mc^3$ ?!? Highlight the text you want to discuss or click the comment button. Find out more about using Authorea on our help page.
