

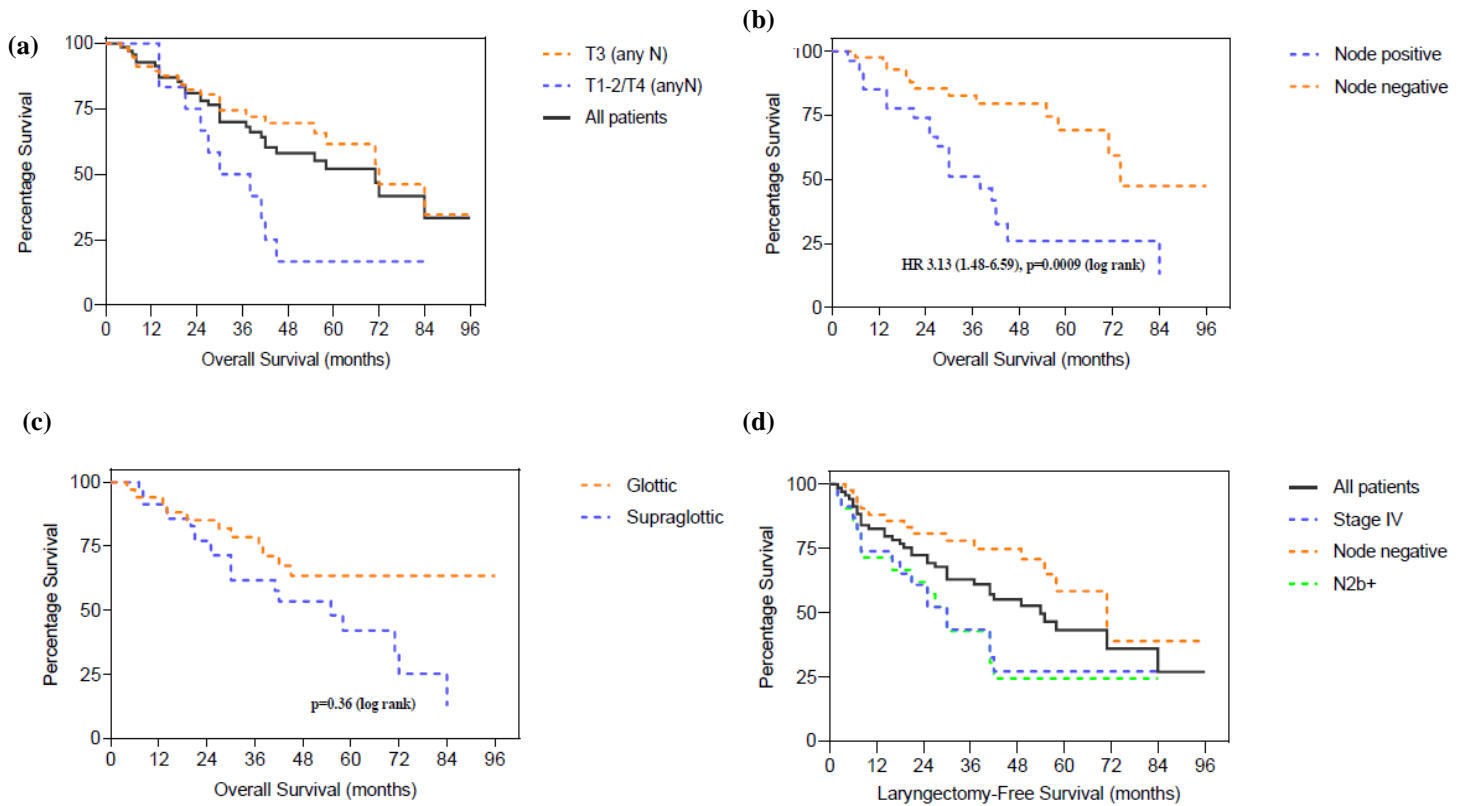

Figure 1. Kaplan-Meier Survival curves of overall- and laryngectomy-free survival

(a) Overall Survival – all patients (n = 69), T3anyN (n=57), T1-2anyN/T4anyN (n=12); (b) Overall Survival by nodal status – node positive (n=28), node negative (41); (c) Overall Survival glottic (n=33) versus supraglottic (n=35); (d) Laryngectomy-free Survival – All patients (n = 69), Stage IV (n = 23), Node negative (n=41), N2b-N3 (n = 20).
