

| Locality | Spatio-temporal group | | Genotypic clusters | Main clusters | Admixture |
|----------|-----------------------|----------|--|---------------|---|
| Finström | 1992-97 | (Red) |  | 13-26-31 |  |
| | 2001-08 | (Green) |  | 5-2 |  |
| | 2009-11 | (Green) |  | 15-26-29-2 |  |
| Föglö | 2000-09 | (Red) |  | 15 |  |
| | 2010-10 | (Bleu) |  | 19-27 |  |
| Kumlunge | 2000-09 | (Yellow) |  | 1-6-13 |  |
| | 2010-11 | (Red) |  | 8 |  |
| Saltvik | 1999 | (Red) |  | 5-6-9 |  |
| | 2005-09 | (Red) |  | 10-13-22 |  |
| | 2010-13 | (Red) |  | 5-9-13-26 |  |
| Sottunga | 2002-04 | (Yellow) |  | 5-9-17 |  |
| | 2005-09 | (Yellow) |  | 9 |  |

Figure 3: The four genotypic clusters of *Hyposoter horticola* based on clustering of 12 spatio-temporal groups of individuals analysis ($k=4$, $p=0.991$), (left) without and (right) with admixture results, and (center) the most common individual clusters in each spatio-temporal group. The main clusters were characterized through the individual.
