

TABLE 2 Attitudes around combined hormonal contraception (CHC) and pregnancy in SCD.

N (%)	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
CHC should never be used in AYA with SCD (n=91)	7 (7.6)	32 (34.8)	29 (31.5)	19 (31.5)	4 (4.3)
CHC can be used if no other risk factors (n=90)	3 (3.3)	20 (21.7)	25 (27.2)	39 (42.4)	3 (3.3)
CDC recommends CHC as unacceptable in women with SCD (n=89)	3 (3.3)	23 (25.0)	38 (41.3)	22 (23.9)	3 (3.3)
Pregnancy is high risk in any woman with SCD (n=92)	1 (1.1)	3 (3.3)	6 (6.5)	37 (40.2)	45 (48.9)

CHC=Combined hormonal contraception. SCD=Sickle cell disease. AYA=Adolescents and young adults.
