Table 3. Unadjusted modeling for association between follow-up care five to seven years after initial diagnosis and risk strata

Risk Strata	Full CCS Cohort		CCS in NC, SC, VA	
	OR (95% Confidence Interval)*	Lack of Fit Test**	OR (95% Confidence Interval)*	Lack of Fit Test**
High vs. Intermediate	1.34 (0.837 ,2.14)	<0.001	1.24 (0.74 ,2.08)	0.0014
Intermediate vs. Low	0.482 (0.3 ,0.774)		0.485 (0.295 ,0.795)	
High vs. Low	0.646 (0.359 ,1.16)		0.601 (0.319 ,1.13)	

*Confidence Intervals shown are corrected for multiple testing using the Bonferroni method.

**The pvalue test the overall association between risk strata and Follow Up [5-7] window.
