

Table 2. Ten years risk of fracture (FRAX) after the appearance of multiple vertebral fractures, number of fractures and data related to the use and withdrawal of denosumab.

	Median CI 95%
FRAX (Major) pre multiple vertebral fractures	11.0 (6.1 - 16.0)
FRAX (Hip) pre multiple vertebral fractures	3.9 (1.2 - 6.6)
Time using denosumab (months)	30.5 (24.0 - 43.5)
Number of dose (n)	6.0 (4.0 – 8.0)
Time after last dose of denosumab and multiple vertebral fractures (months)	11.0 (7.5 - 13.5)
Number of vertebral fractures after denosumab withdrawal (n)	3 (2 – 4)
Number of vertebral fractures accumulated (n)	192
