

Table III Classification of Antecedent Soil Moisture Condition

AMC	Properties of Soils	Total 5-day antecedent rainfall (mm)	
		Dormant Season	Growing season
I	Soils are dry (soil moisture content is at wilting point)	< 13 mm	< 36 mm
II	Average Condition	13-28mm	36-53mm
III	Soils are saturated from antecedent rainfalls (soil moisture content is at field capacity)	> 28 mm	>53 mm
