

1 **Table 3.** Mean annual PTA/PTC admissions per hospital over the five-year study period,  
2 compared with markers of local socioeconomic deprivation and population size. IMD – Index  
3 of multiple deprivations; ONS – Office for National Statistics, ED – Emergency Department.  
4 More severe deprivation is indicated by higher deprivation scores (IMD) or higher ranks (out  
5 of 149; ONS). For local authorities: all of Liverpool local authority was allocated to the Royal  
6 Liverpool Hospital; St Helens, Knowsley and Sefton were allocated to Aintree University  
7 Hospital; Warrington and Halton were allocated to Warrington. Total ED visits reported for  
8 Aintree is the pooled total from Southport and Ormskirk, St Helens and Knowsley and  
9 Aintree EDs (Aintree acts as the secondary care hub for all ENT admissions in these areas).
