

Table 2: Data extraction form

BIBLIOMETRIC PROFILE	
Family name of the first author	
Year of publication	
Journal of publication	
STUDY AND PARTICIPANTS CHARACTERISTICS	
Country of the study	
Study design	1. Cross-sectional 2. Cohort study (baseline data) 3. Case control study 4. Unclear study design
Study period	
Study setting	1. One Faculty 2. More than one Faculty of one university 3. More than one university
Subtype of university students	
Sampling method	1. Probabilistic (to specify) 2. Non probabilistic (to specify) 3. Unclear
Minimal sample size	1. Calculated AND attained 2. Calculated BUT NOT attained 3. Not calculated
Type of data collection process	1. Direct (paper version of data collection form) 2. Social media (WhatsApp, Facebook, etc.) 3. E-mail 4. Other (to precise)
Mean or median age (If not reported, please write NR.)	
Inferior limit of age in years (as reported in the results or in the selection criteria) (If not reported, please write NR.)	
Superior limit of age in years (as reported in the results or in the selection criteria) (If not reported, please write NR.)	
KEY DATA EXTRACTION SECTION	
Label of the studied condition	
Tool or method used to conclude (Write NR if not reported)	
Cut-off used (Write NR if not reported)	
Total sample size	
Total number of male participants (Write NR if not reported)	
Total number of female participants (Write NR if not reported)	
Frequency of the studied condition (with details according to the severity)	
Associated or risk factors of the studied condition (Write NR if not reported)
