Categorisation Data For Table 4: Responses to 'What makes a story science fiction?' (SF) and 'What makes it fantasy?' (F). Coded as 1 = is present, 0 = not mentioned, -1 = not present. Data is in Paired Sets of Responses

NOTE: A word frequency analysis of the full responses was used to identify the categories to be coded. These were consolidated based on similarity e.g. 'possible' and 'plausible' consolidated to 'possible', 'magic' and 'magical' consolidated to 'magic'. Multiple use of terms in one response were recorded as one instance for categorisation purposes. Occurrence as a genre label alone was discounted.
